

QUICK GUIDE INNSTALL MACH3 ETHERNET

1. Mach3 software installation:

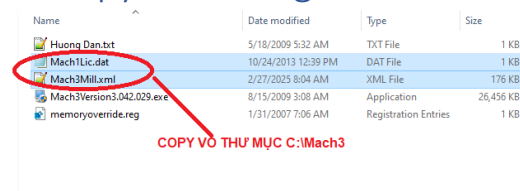

Access the link in QR code(at the bottom download : Softs), install the software and untick "Parallel port".

2. Setup static ip for computer:

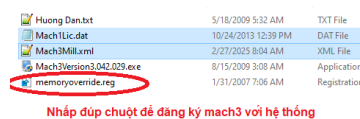

3. Copy file config file and lic file:

Copy both files to C:\Mach3 folder, replace existing file.

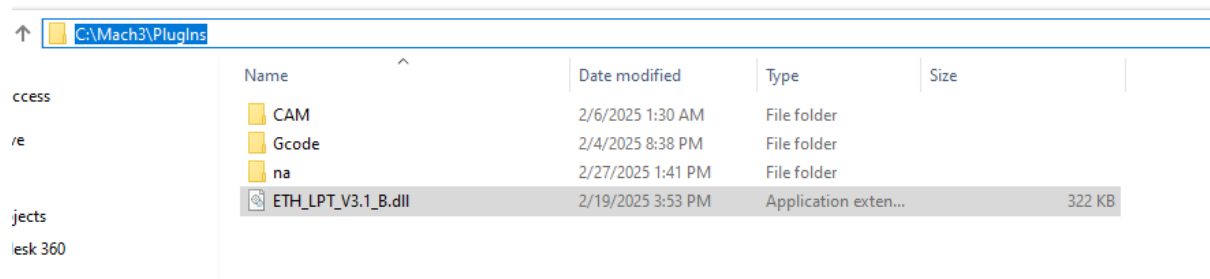

Double click .reg file to register Mach3 to system.

Download Plugin:

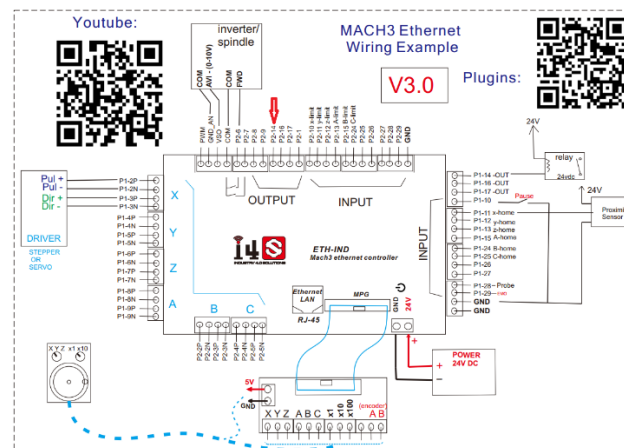

PDF Quick_guide ----->>>> [QUICK GUIDE PDF](#)
 ----->>>>
 Download----->>>> [DOCUMENTS](#)
 ----->>>> [Cach lưu dòng lệnh khi mất đi](#)
 Download----->>>> [Plugin 30_D](#)
 Download----->>>> [Plugin 31_A](#)
 Download----->>>> [Plugin 31_B](#)
 Download----->>>> [Remote Example Code](#)
 Download----->>>> [Plugin 40_D](#)
 Download----->>>> [DINH VI CAMERA](#)
 Download----->>>> [soft](#)

Copy the plugin file to C:\Mach3\Plugins

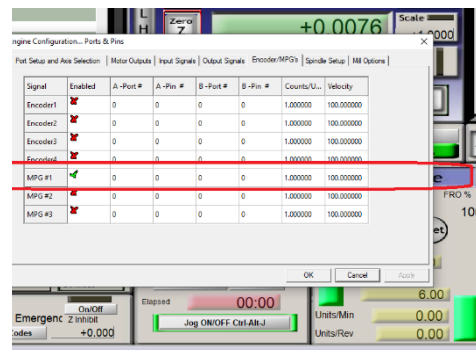

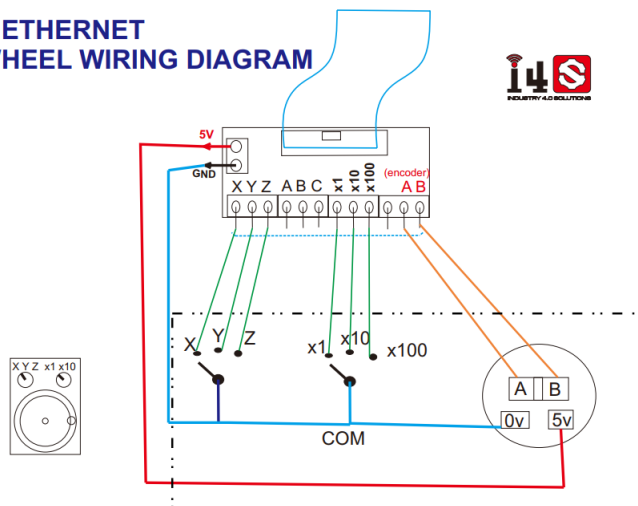

Now plug ethernet cable from controller to computer, **open Mach3 software on computer first and turn on controller right after**. Press "RESET" button on Mach3 screen, it will connect automatically.

Wiring diagram.

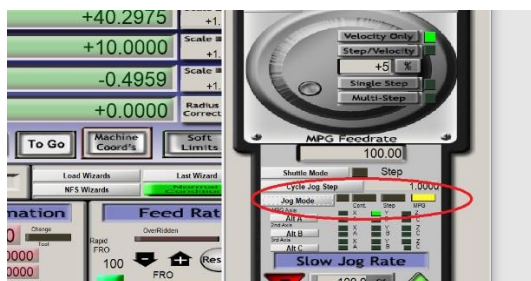

Handwheel diagram:

MACH3 ETHERNET HANDWHEEL WIRING DIAGRAM

Press "Tab" on keyboard, select MPG mode.

Toggle switch x1 and x10 on the handwheel, now rotate the encoder to move it.
